SHRAVAN SAMBHAJI KAPARE

Computer Science Engineering Student
+91 9970201267 | shravankapare2004@gmail.com
LinkedIn | GitHub | LeetCode | GeeksforGeeks

Computer Science Engineering student with hands-on experience designing and developing software applications using Python, backend technologies, desktop automation, and Generative AI. Passionate about building scalable software solutions that solve real-world engineering problems.

Education

Bachelor of Technology – Computer Science & Engineering — **CGPA: 8.76/10**
Tatyasaheb Kore Institute of Engineering & Technology, Warananagar — Expected: 2027
Class XII – Yashwantrao Chavan Warana Mahavidyalaya — 67% (2023)
Class X – Yashwant International English Academy, Kodoli — 88% (2021)

Technical Skills

Programming Languages: Python, C++, C, SQL
Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
Backend & Databases: Flask, Streamlit, REST APIs, SQLite, Firebase, MySQL
Artificial Intelligence: Generative AI, LLMs, Prompt Engineering, Conversational AI, Ollama, Gemini API, Grok API, Document Intelligence
Automation: Playwright, PyAutoGUI, PyWinAuto, psutil, subprocess
Libraries: PyMuPDF, Faster-Whisper, Piper TTS
Tools: Git, GitHub, Linux, VS Code

Experience

Freelance Software Developer

- Developed Python-based software solutions for academic clients from requirements to delivery.
- Built backend applications using Flask, Firebase and SQL while performing testing and debugging.

AI & Machine Learning Virtual Intern – Plasmid Corporation

- Implemented machine learning workflows, data preprocessing and model evaluation through practical AI/ML assignments.

Projects

GenAI Insurance Policy Assistant (Team Leader)
Tech Stack: Python | Streamlit | Flask | Gemini API | Grok API | SQLite | PyMuPDF

- Developed an AI-powered insurance assistant for policy understanding and claim guidance.
- Built a PDF document processing pipeline using PyMuPDF and integrated Gemini and Grok APIs.
- Designed Flask backend services with SQLite and led project implementation.

Astra – Desktop Automation Assistant
Tech Stack: Python | Ollama | Faster-Whisper | Piper TTS | Playwright | PyAutoGUI | PyWinAuto

- Developed a desktop AI assistant supporting local LLM inference, voice interaction and workflow automation.
- Automated browser, desktop and system tasks using Playwright and Python automation libraries.
- Designed a modular architecture for scalable automation features.

EVision – EV Charging Station Finder

- Developed a location-aware EV charging station finder using Firebase and location services.

IoT-Based Smart Accident Prevention System

- Developed a vehicle safety prototype using embedded sensors.
- Secured **3rd Rank** in a National Level Project Competition.

Achievements

- 3rd Rank – National Level Project Competition.
- Participant – Adobe India Hackathon.
- Participant – HackRx by Bajaj Finserv.

Leadership & Certifications

- Head, Logicode Coding Committee – Led technical events and coordinated volunteer teams.
- AI & Machine Learning Virtual Internship – Plasmid Corporation.
